Participation as Swiss applicant to the NEURON call is restricted to one proposal per call.

PARTNERS
Partners of the international project consortium applying for funding at funding agencies other than the SNSF cannot be declared as 'project partners' in the sense...
of article 11.2 of the SNSF Funding Regulations. They are to be declared as 'consortium partners' and apply for their funding at their respective research funding organisation.

**APPLICATIONS**
Projects must comply with the SNSF Project Funding regulations; please refer to the above regulations.

**Overlapping funding periods with ongoing SNSF grants:** article 17 of the SNSF Funding Regulations applies.

Besides submitting the consortium application to the electronic submission system of the Call, **Swiss applicants must submit the pre-proposal via mySNF** to the same deadline as the consortium application is submitted too. For this, Swiss applicants are asked to contact the National Contact Point or div3@snf.ch beforehand as soon as possible but no later than two weeks before the submission deadline of the pre-proposal to get further information on the submission procedure.

For applicants who will be invited to submit a proposal for the second stage, full proposal forms will be generated in mySNF.

**In case of funding, applicants have to submit a Data Management Plan**

funding acquired by eligible institutions under eligible funding schemes. Contributions are paid in retrospect at a flat rate.
Researchers need to develop a DMP for the entire Collaborative Research Project (CRP). The DMP must comply with the SNSF policy on open research data and is mandatory for the release of funds for Swiss sub-projects. For further information, please refer to http://www.snf.ch/en/theSNSF/research-policies/open_research_data/Pages/default.aspx.

The SNSF exclusively funds research conducted for purposes that are not directly commercial. Pursuant to the Research and Innovation Promotion Act RIPA and the legal framework of the SNSF, no research grants are awarded if the relevant research is conducted for directly commercial purposes or if the persons involved in the research work are not scientifically independent.

Note: Besides the eligibility check, the SNSF proceeds to a material check. This refers to the applicant’s experience and research activity during several years as well as the demonstration of their scientific independence (Art. 4, Project funding regulations).
